

Progress Report

Day 18 — Team Detail Placeholder and State Handling

Task Management MERN Stack Platform

Shafin Nigamana | 06 June 2026

1. Day-18 Objective

The objective of Day 18 was to enhance the Team Detail page by replacing the basic placeholder with a structured interface prepared for future Kanban functionality and to ensure that all data-fetching pages support proper loading and error state handling.

2. Tasks Completed

Team Detail Page Enhancement

- Replaced the basic team detail placeholder with a structured page designed to support future Kanban board integration.

Implemented sections:

- Team Details
 - Planned Workflow
 - Upcoming Features
- Utilized route parameters to dynamically display team-specific information through React Router.

```

1 import { useEffect, useState } from 'react';
2 import { useParams } from 'react-router-dom';
3
4 function TeamDetailPage() {
5   const { id: teamId } = useParams();
6   const [loading, setloading] = useState(true);
7   const [error, setError] = useState(null);
8
9   useEffect(() => {
10     const fetchTeamDetails = async () => {
11       try {
12         setloading(true);
13         setError(null);
14         // Simulate a network request for the placeholder page
15         await new Promise(resolve => setTimeout(resolve, 500));
16         // To verify the error state, you could throw an error here:
17         // throw new Error('Simulated error');
18       } catch (err) {
19         setError('Failed to load team details.');
```

```

47 function TeamDetailPage() {
48   <div className="dashboard-header">
49     <h1 className="dashboard-title">Team Details</h1>
50     <p className="dashboard-subtitle">Team workspace and task management preparation</p>
51   </div>
52
53   <div className="dashboard-section" style={{ marginBottom: '24px' }}>
54     <h2 className="section-title">Team Details</h2>
55     <div style={{ marginBottom: '8px' }}>
56       <p style={{ margin: '0 0 12px 0', fontSize: '0.95rem', color: '#64748b' }}>
57         <strong style={{ color: '#0f172a' }}>Team ID:</strong> {teamId}
58       </p>
59       <p style={{ margin: '0', fontSize: '0.95rem', color: '#64748b' }}>
60         <strong style={{ color: '#0f172a' }}>Description:</strong> This page will host the
61       </p>
62     </div>
63   </div>
64
65   <div className="summary-grid">
66     <div className="summary-card">
67       <div className="section-title" style={{ marginBottom: '12px' }}>Planned Workflow</div>
68       <ul style={{ margin: '0', padding: '0 0 20px 0', color: '#64748b', fontSize: '0.95rem' }}>
69         <li style={{ margin: '0 0 8px 0' }}>To Do</li>
70         <li style={{ margin: '0 0 8px 0' }}>In Progress</li>
71         <li style={{ margin: '0 0 8px 0' }}>Done</li>
72       </ul>
73     </div>
74
75     <div className="summary-card">
76       <div className="section-title" style={{ marginBottom: '12px' }}>Upcoming Features</div>
77       <ul style={{ margin: '0', padding: '0 0 20px 0', color: '#64748b', fontSize: '0.95rem' }}>
78         <li style={{ margin: '0 0 8px 0' }}>Task assignment</li>
79         <li style={{ margin: '0 0 8px 0' }}>Drag and drop workflow</li>
80         <li style={{ margin: '0 0 8px 0' }}>Status updates</li>
81         <li style={{ margin: '0 0 8px 0' }}>Audit logging</li>
82       </ul>
83     </div>
84   </div>
85
86   </div>
87
88   </div>
89
90   </div>
91
92   export default TeamDetailPage;

```

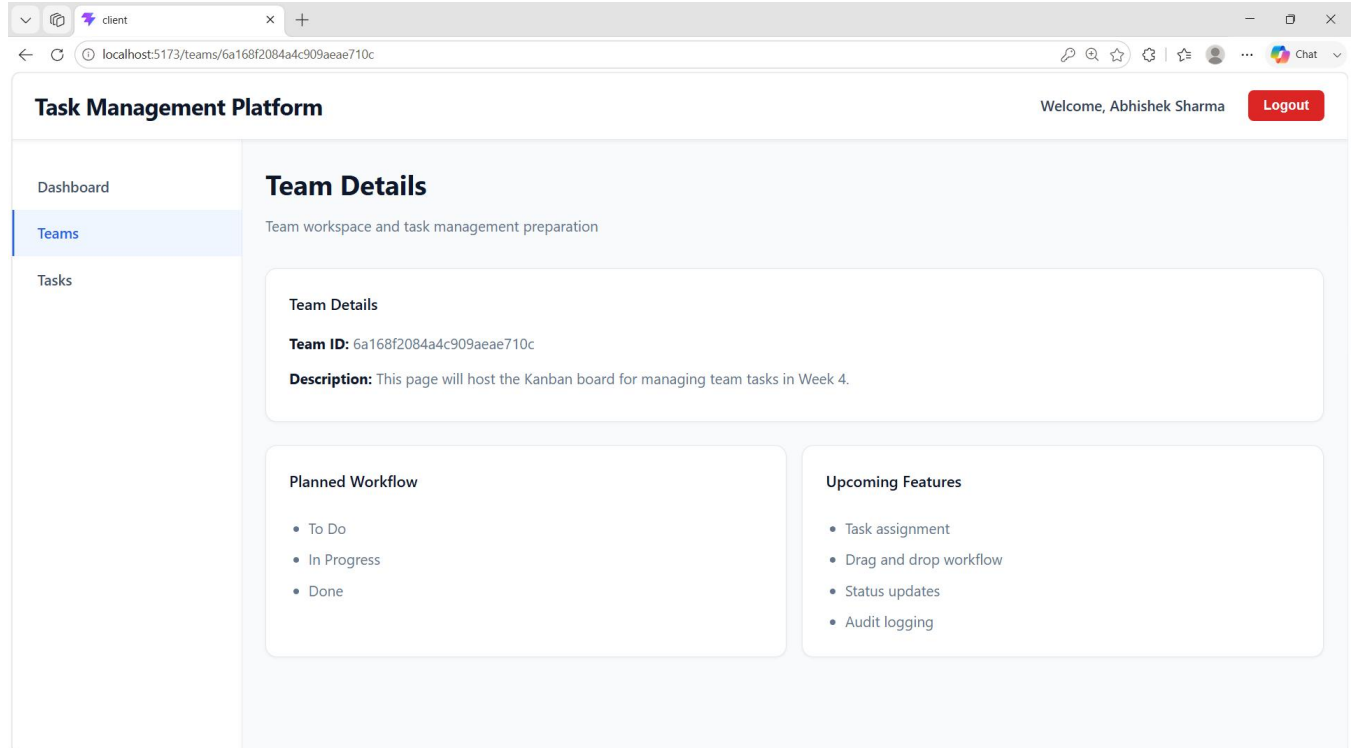

Figure 2.2 — Team detail page displaying placeholder information for future Kanban integration.

Kanban Workflow Preparation

- Added a visual representation of the planned Kanban workflow that will be implemented during the next development phase.

Workflow stages prepared:

- To Do
 - In Progress
 - Done
- Established the structural foundation for drag-and-drop task management functionality.

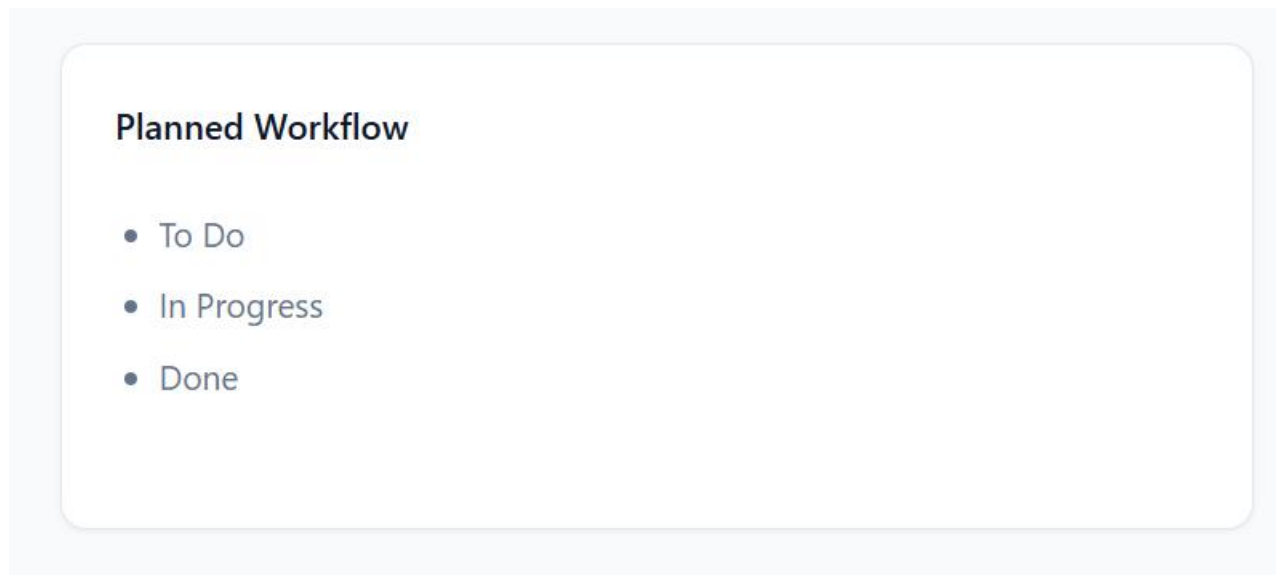

Figure 2.3 — Planned Kanban workflow structure prepared for Week 4 implementation.

Future Feature Planning Interface

- Added a dedicated section outlining upcoming functionality planned for future development.

Planned features:

- Task Assignment
 - Drag and Drop Workflow
 - Status Updates
 - Audit Logging
- Provided a clear roadmap for subsequent feature implementation.

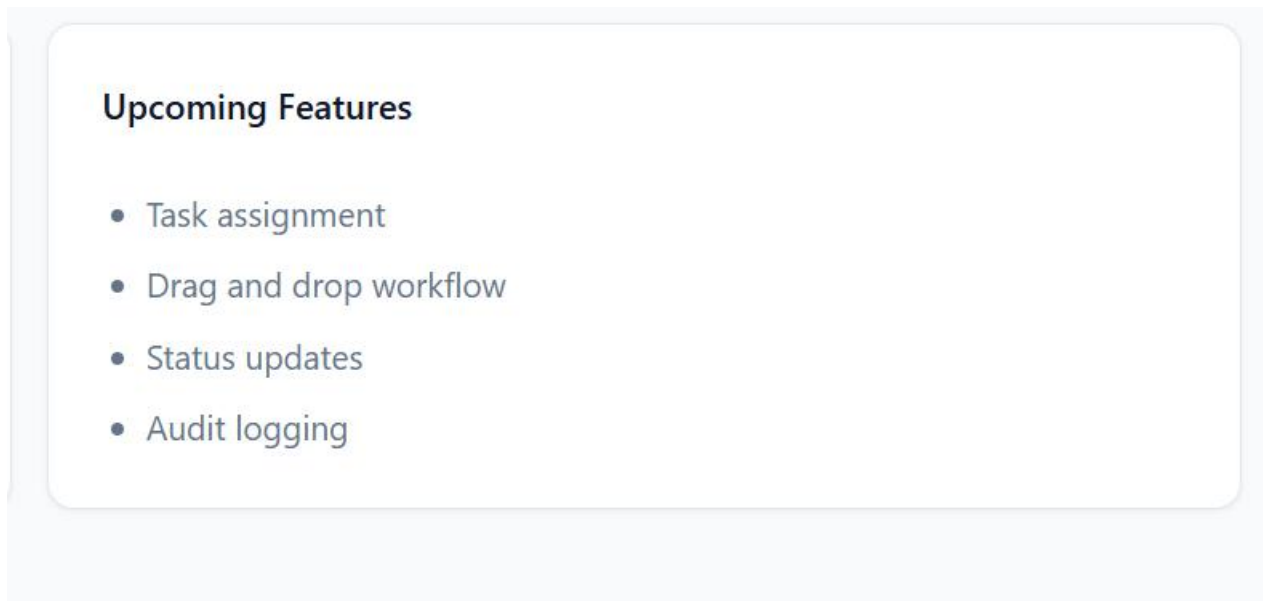

Figure 2.4 — Future task management features outlined within the team detail page.

Loading State Verification

- Verified loading state implementation across all pages that retrieve data asynchronously.

Validated pages:

- Dashboard Page
 - Teams Page
 - Team Detail Page
- Ensured consistent user feedback during data loading operations.

```
function TeamDetailPage() {
  const { id: teamId } = useParams();
  const [loading, setLoading] = useState(true);
  const [error, setError] = useState(null);

  useEffect(() => {
    const fetchTeamDetails = async () => {
      try {
        setLoading(true);
        setError(null);
        // Simulate a network request for the placeholder page
        await new Promise(resolve => setTimeout(resolve, 500));
        // To verify the error state, you could throw an error here:
        // throw new Error('Simulated error');
      } catch (err) {
        setError('Failed to load team details.');
```

Figure 2.5 — Loading state implementation for the team detail page.

Error State Verification

- Verified error handling implementation across all data-fetching components.

Validated pages:

- Dashboard Page
 - Teams Page
 - Team Detail Page
- Confirmed graceful error presentation using reusable error card styling.

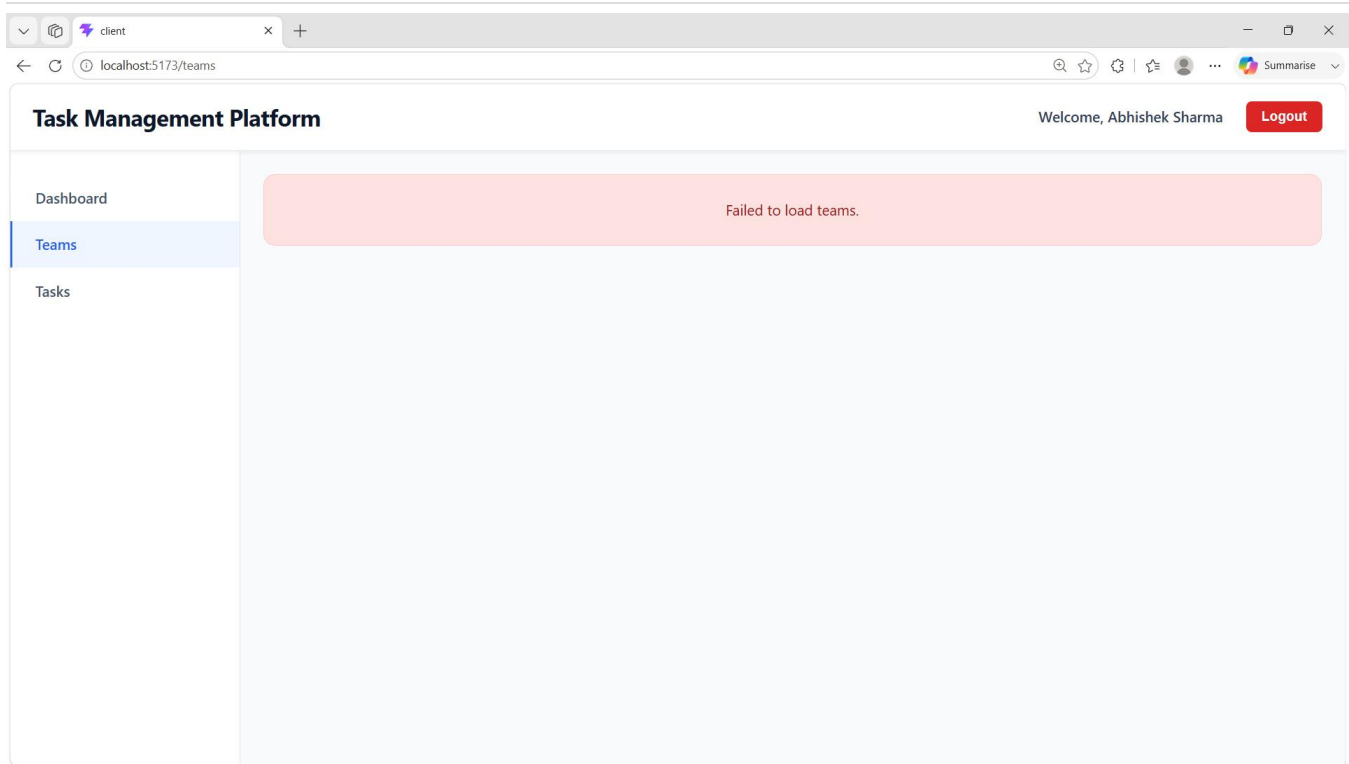

Figure 2.6 — Error state handling implementation for the team detail page.

3. Conclusion

Day 18 focused on preparing the Team Detail module for future Kanban board development while improving application robustness through loading and error state validation. A structured placeholder interface was implemented, workflow planning elements were added, and consistent state handling was verified across all data-driven pages. The application is now prepared for the upcoming task management and Kanban workflow features.
